SUMMARY

- **3 years of professional application development experience as an agile developer**
- **Tech stack: Java, Springboot, Angular, PostgreSQL, Jenkins, EKS, AWS, Kubernetes, MongoDB, JSON, Cucumber, Selenium, JUnit, RestAssured, SonarQube, Docker, Git**

PROFESSIONAL EXPERIENCE

AGILE DEVELOPER | 6/2020 - present
Freddie Mac

- 3 years of professional experience working on an agile scrum team to build high volume micro services to help homeowners retain their houses.

- Utilizing Angular, Java 8, Springboot, and postgreSQL for development, testing using JUnits, selenium, cucumber, and restAssured to develop automation scripts, monitoring with Kibana and Kiali

- Act as backup for the tech lead, being a main point of contact for several applications. Includes handling production and non prod issues, triaging work and managing and remediating blockers for the team.

- Point of contact for junior members of the team: help junior devs get up to speed on business objectives and values, set up or troubleshoot local environments, and provide knowledge transfer sessions

- Help manage CI/CD pipelines using Jenkins, fostered industry best practices with design and code reviews and discussion on integration between teams

- Completed hackathons hosted by Freddie Mac to learn several technologies, not limited to: DevOps, AWS, MongoDB, automation testing, kibana, graphQL

- Maintained brownfield legacy applications by making FOSS and SAST changes, and using service now to manage releases and track NFRs.

- Led a team for 2 years to curate achievements across the department into a newsletter sent out quarterly, working with leads and VPs to refine wording and design before final production.

WEBSITE SCRAPING | 11/2022
Decision Desk HQ

- Acted as a short term help to create scrapers written in python using pandas and selenium to gather election information from county websites to help the company predict election outcomes.

- Had to learn new technologies on the fly and communicate with the team on any issues or help needed in a high-stress environment

EDUCATION

AWS CLOUD PRACTITIONER CERTIFICATION | 3/2022
AWS CLOUD DEVELOPER CERTIFICATION | Pursuing
COMPUTER SCIENCE & SOFTWARE ENGINEERINGS B.S. | 9/2018 - 6/2020
University of Washington Bothell
